

# HIGHWAY 169 I-494 to Mankato

## INTERREGIONAL CORRIDOR

### LONG-TERM CORRIDOR VISION AND ACCESS STRATEGIES

Based on the current performance, expected growth, and physical constraints, the Corridor Partnership established a long-term performance vision of 65 mph for the corridor. Based on this vision, the following strategies were developed:

- 1) Transition to a freeway from Interstate 494 to Belle Plaine. Also transition to a freeway through Mankato and North Mankato.
- 2) Maintain current expressway with improvements at selective locations in the remaining portion of the corridor except for the St. Peter area.
- 3) Potential St. Peter bypass
